**Brand:** Signia  
**Hearing Aid:** Insio ITE Px  
**Release date:** Late 2017  
**Hearing Loss:** Mild, Moderate or Severe Hearing Losses

**Overview:**

The Signia Insio ITE Px hearing aid is a custom-made device that sits in-the-ear canal opening and on the inside with a precise vent to allow a natural sense of sound processing. The hearing aid runs the Primax platform that primarily balances the three key features (noise reduction, directionality, and amplification features) to clear out the listening experiences from noise and enhance the speech signals important to the acoustic scenario. The device can support mild hard-of-hearing to moderate type of auditory impairment and even some levels of severe hearing loss. For increased discretion and cautious wearing, the Insio ITE hearing aids can be customised to match closest to your skin tone. Get yours now and start hearing better with us.

**Brand:** Unitron  
**Hearing Aid:** Insera 312 Omni  
**Release date:** Late 17  
**Hearing Loss:** Mild, Moderate or Severe Hearing Losses

**Overview:**

The ultra-discreet style Insera 312 Omni 3DX hearing aid from Unitron's latest technology platform Discover Next comes with an acoustic system that can classify the type of listening situation to intelligently adjust the settings and match the needs of the wearer. The hearing aid programs combine the three main factors to highlight speech signals by effectively reducing the identified noises from the scenario and focuses on the area where the voice is coming from. The sound chip of the device uses the strategic microphone system to maintain the natural sense of the acoustic environment. For easy access and control of the hearing aid features and technological capabilities, the Insera 312 Omni device can be connected to several media devices, accessories, and remote-control unit.
